

Aduna and Modica Group Partner to Advance Fraud Prevention and Identity Verification

Exploring global opportunities starting with SIM Swap and Number Verification APIs Aduna, the global aggregator of standardized network APIs, and Modica Group Limited, an Australian and New Zealand-based global CPaaS platform provider and trusted partner to mobile operators and aggregators, today announced a strategic collaboration to enhance fraud prevention and identity verification services. The partnership will initially explore opportunities in strategic and emerging markets such as Asia Pacific and Latin America, focusing on SIM Swap detection and Number Verification use cases.

Modica Group is partnering with Aduna to strengthen its portfolio in mobile identity and fraud protection by integrating Aduna's standardized network API capabilities. The collaboration will introduce advanced services such as SIM Swap detection and Number Verification, complementing Modica Group's existing solutions for identity verification, user authentication, and customer engagement including OTP and Mobile ID.

"Mobile identity protection and fraud prevention are significant concerns for all of our international clients. With our CPaaS solution, we have a proven track record as trusted service providers to mobile operators, governments, and large enterprises. We combine our CPaaS infrastructure with Aduna's standardized network APIs to launch mission-critical services, including proactive SIM Swap detection and number verification, to ensure the security and control of our clients' mobile communications across these high-growth market regions." said Richard Babanour, Head of International Markets and Partnerships at Modica Group.

"As demand for trusted digital identity and fraud prevention solutions continues to grow, collaborations like this are essential to accelerating adoption and delivering value at scale," said Peter Arbitter, Chief Commercial Officer at Aduna. "By working with Modica Group, we can extend the reach of Aduna's standardized network APIs into key growth markets, enabling businesses to strengthen customer trust, reduce fraud risks, and create more secure digital experiences. Together, we are helping build a more connected and trusted digital ecosystem."

About Modica Group

Modica Group is the global intelligent messaging company for enterprises, telcos, and aggregators worldwide. Modica's unified CPaaS Platform supports SMS, MMS, email, WhatsApp, voice, video, push notifications, Payments, and more — backed by enterprise analytics, security, and world-class support. Trusted by organizations including the Australian and New Zealand Governments, Financial Services, Airlines, Utilities, Logistics and Healthcare Providers. About Aduna

Aduna is a landmark venture between some of the world's leading telecom operators and Ericsson, dedicated to enabling developers worldwide to accelerate innovation by leveraging networks to their full potential via common network Application Programming Interfaces (APIs). Its venture partners include AT&T, Bharti Airtel, Deutsche Telekom, KDDI, Orange, Reliance Jio, Singtel, Telefonica, Telstra, T-Mobile, Verizon and Vodafone. By combining network APIs from multiple operators globally under a unified platform based on the CAMARA open-source project, driven by the GSMA and the Linux Foundation, Aduna provides a standardized platform to foster collaboration, enhance user experiences, and drive industry growth.
